these, and the best qualities of all the best med!- A Hot Contest at the Virginia Park-The Newarks Retalinte on the Home

Nine-3 to 2 in Eleven Innings.

The second game between the Newarks The second game between the Newarks and Virginias was played yesterday afternoon in the presence of quite a large crowd of spectators, and was decidedly the most interesting and hotly-contested that has taken place here this season. Many who witnessed the game of Tuesday afternoon were of the opinion that it was not a fair great foundries, machine-shops manufactories, flour-mills, tobac manufactories, flour-mills, tobac test of the strength of the visiting nine, especially when taking into consideration the fact that they were fatigued from travel and generally out of gear. The result yesterday confirmed that opinion, the Newarks proving themselves to be first-class players in every respect. Their fielding was exceptionally fine, and at the bat they far outshone their competitors, The home club did some splendid fielding, as the score attests; but they were sorely puzzled by Creeden's pitching, and did not "catch on" to his style during the entire game. But what hurt them worse than anything else was the superb manner in which Murphy and Hatfield, catcher and second base respectively of the Newarks, played into each others' hands. To make first base was comparatively an easy matter, but not so with the second. It seemed impossible for the Virginias to get there game. But what hurt them worse than anything else was the superb manner in

their being blanked. In this inning the visitors made one run, which was scored by Gaunt. The second inning resulted in both sides being blanked. In the third, Hankins scored the first run for the Virginia of the control of the con 2 to 2, which necessitated another inning. In the tenth both sides were retired in one-two-three order. Amid great excitement the Virginias then took the bat for the eleventh time. Latouche, Glenn, and Nash were the batters, and each was retired in short order. The visitors then went to the bat. Batterson, unfortunately for the Virginias, got his first on called balls. Gaunt made first base by a safe hit, sending Batterson down to second. Bat-First.—IT IS HEALTHFUL AND NUTRI-TIOUS. It contains within itself the highly nutri-tious and strength-giving phosphates which are

Unless the weather interferes the final

The "Horsford Almanac and Cook-Book" sent game between these two clubs this afternoon will probably be witnessed by one of the largest crowds which has ever attended a game of base-ball here.

RICHMONDS VS. OUR BOYS.

all condemned murderers, he is the perfection of candidacy for immortality, and his forcible removal of poor old Daniel, who never did him a particle of harm, nor any one else, so far as the evidence in the trial disclosed, does not in the least bar his entrance to the kingdom above, if his actions and expressions be a criterion. Leastwise, this is what the crowd of ignorant, dusky loafers that throaged Henrico court-house yesterday supposed, if one is left to base an opinion upon the remarks let fall by them when it was ascertained that the crowd had been brought out to be near, if not present, at the baptism of Lee. This ceremony was performed in the atternoon yesterday by the Rev. George Boswell, of the Eighteenth-Street Colored Baptist church. About twenty friends of Lee were present, and a big bath-tub furnished the pool of water.

The scaffold is in course of erection on which Lee will pay the penalty of his high crime, and he will have ample opportunity to make his peace with God before his dread taking off.

His accomplice in the crime, Barbara Miller, the wife of the murdered man, maintains a calm demeanor and declares the veride and continuent of the courty. The great benefit to that part of the city in which these works are located will be close to the scene of their labors—induces ments hard to be found anywhere else in the world.

AHEAD OF ALL.

AND OF ALL.

AHEAD OF ALL.

AHEAD OF ALL.

AND OF ALL.

AN

dread taking off.

His accomplice in the crime, Barbara Miller, the wife of the murdered man, maintains a calm demeanor and declares the verdict against her a just one. She will be bung in September, and as a matter of course will have more time to get ready to die.

AN IMPORTANT INDUSTRY. THE TANNER & DELANEY ENGINE-

WORKS.

semething That You Ought to Read, Show ing, as It Does, the Rise and Progress of a Great Enterprise, and the Results That Lie Within the Reach of Those Who Dare

What man of money or business knowledge outside of a limited few is there who knows that right here in his own city of Richmond is situated the largest and bestequipped engine-works establishment in the United States?

the land; when minerals and machinery are forcing something new, startling, and for the South Atlante State, fair weathare forcing something new, starting, and
or, preceded by local rains on the North
Carolina coast, northeasterly winds in the
northern portion, westerly winds in the
southern portion, stationary or rising barometer and temperature.

The south Atlante State, fair weathare forcing something new, starting, and
money-making almost every day upon public attention, it does seem a little strange
that capitalists, men of means and curiosity
of research, should not be better posted
concerning an industry of so much moment. Yet the fact remains that they are not. A number of reasons present them-selves to account for this, but they need not be mentioned now. It is needless to talk of the easy-going state of affairs in our business of the idea that it is discourteous to pry into your neighbor's business; of the little it takes to bring contentment to a people blessed with so many happy sur-roundings as our people are; of the igno-rant ideas that prevail abroad as to our so-sial and political surroundings; all of these views readily suggest themselves to the reflective mind, and it is only necessary to about our proud city generally, when al-luding particularly to the Tanner & Dela-

> BRIEFLY ABOUT BICHWOND. This city in one sense is known to the world, and yet but little is known of its great foundries, machine-shops, general manufactories, flour-mills, tobacco-works, etc. that are here quetly running without much ado, but in many instances sending their products to all parts of the world.
>
> Here dware deal to have beyone are been considered with this is a storehouse for in the modern and iron, and connected with the control with the removed to allow of continuing the machine-shop still further back, making a building then of nearly 600 by 66 feet.
>
> These constitutes the using halidings.

Richmond had a population of about 65,000 in 1880; this has, however, been in-

ifrom Hampton Roads. Vessels drawing sixteen feet can come to her docks. Her water-power is very important. From the Three-mile lock, on the line of the Richmond and Alleghany railroad to tide-water there is a fall of eighty-four feet. With the lowest flow of the river to be expected in a long series of years—viz., 1,000 cubic feet per second—this fall produces 95,500 horse-power theoretically, of which 7,600 can be made available by the employment of this theoretical power, now appropriated and put to use by various manufactories in Richmond and Manchester, is 4,200; the remainder, 5,300 horse-power theoretically, or 4,160 actual, can be readily and economically made available.

Has a steam dammer that maniphidates the heaviest forgings. In the various shops are found planers, radial drills, horizontal and vertical boring machines, shapers, milling machines, shapers, milling machines, shapers, milling machines, shapers, and stud machines, grinding machines, &c., all new and of the best and most approved patters. The casing-room of the foundances, cupotas, fams, and cranes capable of handling the heaviest class of castings up to twenty tons weight. The pattern-shop is supplied with the best tools, wood-planers, lathes, etc. The machinery in each shop is driven by a separate engine, all moved by one battery of boilers of nearly 300-horse power. Underneath each shop is a tunnel in Thompson arcead. Also, Grav align Martha. dily and economically made available. Underneath each shop is a tunnel in From Bosher's dam to tide-water is a fall which are placed the steam-, water-, gas-, From Bosher's dam to tide-water is a fall of 116 feet, over which the above flow of the river would produce 13,500 theoretical horse-power, or 10,000 actual. The water-shed of the James river above Richmond is about 8,000 square miles. The lowest flow given above is therefore a yield of 0,125 cubic feet per second from each square mile.

The company is incorporated and company are mile.

Why, then, cannot capital and labor thrive here? There is nothing to prevent,

and in proof thereof we cite the success of It is needless to tell of their early history. Newarks.... 1 0 0 0 0 0 1 0 0 1 1 0 0 1—3

Time of game, 2 hours and 25 minutes.

Umpire, M. Walker. Scorer, H. C. Johnston.

Ledes the weather interferes the five con's Quarter branch a more favora-ble situation could hardly have been found. One of these streams, running in front of the main building, has been converted into a lake which is not converted into a lake, which is not only ornamental but forms a reservoir The game between the Richmonds and the works and their protection in case of Our Boys, of Baltimore, resulted in favor of the Our Boys by a score of 14 to 4.

Proparing for the Journey.

Charles Henry Lee (colored), condemned to be hung on the 3d of August next for the murder of Daniel Miller, an inoffensive old colored man who lived near Hungary Station, has been going through the approved formula of getting his accounts in order preparatory to his final audit. Like all condemned murderers, he is the perfection of candidacy for immortality, and his forcible removal of poor old Daniel, who nover did him a particle of harm, nor any one eise, so far as the evidence in the trial disclosed, does not in the least bar his

manner little thought of, except by those who pay attention to such things. In this alone will be demonstrated the advantages

DAILY DISPATCH.

In this age of advancement and progress, when enterprise with rapid and courageous movement is striding abroad in located is two stories high, with a mansard roof, and in this second story is the drawing-room, and over that a large and well-lighted room that will be used as a reading-room and library, which no doubt will be duly appreciated by the employés. In the rear of this main building are three distinctions or wings. distinct continuations or wings, but really are a part of the main building. The first of these, on the south, is the boiler-shop, 196 feet deep by 66 feet wide, with a pitch of 18 feet; the central, of the same dimensions, is the machine-shop; and the north-ern, of the same dimensions, is divided ern, of the same dimensions, is divided into a pattern-shop, 66x56; and a smith's shop 66x140 feet. In rear of the last, and connected with it, is the brass foundry, 41x56 feet; and in rear of this, but also in connection, is the foundry, 150x200 feet, with a pitch of 39 feet. Still further in the rear, but detached, is the pattern-house, for the storage of pattern. This building is there stories high. revert briefly to them in saying something terns. This building is three stories high, and over it is a capacious water-tank, supplied from the lake, and holds 25,000 gal-lons, and can be filled in one hour. It is ney Engine-Works, one of the many mon-uments of truth to the claim made that no nearly 100 feet high, from which water is city in this great country presents more advantage to him who seeks for wealth and conveyed by pipes to every part of the works. The rooms in this building are 80 by 36 feet. In rear of the central wing is the carpenter's shop, 158 by 66 feet.

their products to all parts of the world.
Huge dry-goods jobbing-houses are here,
with room for more; immense groceryhouses, with a good trade; furniture establishments, shipping south; agricultural
and fertilizer depôts abound, while a large
number of small industries are thriving. The various industries are thriving, say of these works can be gained from the persons, and have an invested capital of \$15,000,000, with annual sales amounting to \$40,000,000. The entire business probaimpossible for the Virginias to get there except on a good hit by a batter.

The game commenced at 5 o'clock, with the home club at the bat, and resulted in the home club at the bat, and the bat at

In the erecting-shop is a steam travellingereased since to 71,000. Taxes on real erane, managed by one man, that picks up estate are 40 cents on \$100; income 1 per an object of fifteen tons and deposits cent. The fire and police departments are it wherever needed. It is a massive iron both sides being blanked. In the third, Hankins scored the first run for the Virginias. Both sides were now working hard, and succeeded in holding the score down to 1 to 1, when, on the eighth in ning, the Newarks got in one more run, making the score stand 2 to 1 in favor of the visitors. At the beginning of the right to first, Nash followed with a safe hit to first, Nash followed with a hot ball to second, which Hatfield fumbled and then threw it over the first baseman's head. This let Gleun in and brought Nash down to third. Powell, Scharf, and Morgan were put out, which ended the ining for the Virginias, leaving Nash on base. The visitors then went to the bat, and were blanked. The score now stood 2 to 2, which necessitated another inning.

The company is incorporated and composed mostly of Richmond men. The directors are Messrs. William E. Tanner, Alexander Delaney, John H. Montague, T. William Pemberton, J. J. Montague, and R. A. Lancaster. The managing proprietors are Messrs. William E. Tanner as president, and Alexander Delaney superintendent; both practical men, who learned It is known here. They had the troubles intendent; both practical men, who learned incident to all men of enterprise who strike their business, and learned it well, in Richout boldly for success, but they met them bravely and overcame them, and about lifteen months ago determined to make greater efforts, by erecting larger works and introducing all the modern labor-saving and improved machinery. They bought twelve acres of land just outside of the corporate limits, in the northeastern section of the city, on the line of the Chesapeake and Ohio railway, and on the broad angle of level railway, and on the broad angle of level ny, but who was for many years previous ground formed by Shockoe creek and Baconnected with the business of Messrs.
